2010 Annual Conference October 14-15, Ottawa

This year, we focused our annual conference on the federal environmental assessment process since the *Canadian Environmental Assessment Act* will soon undergo a legislative review. The 2010 conference was overwhelmingly well received by all participants. The conference attracted over 120 participants.

Comments and input from speakers and participants will be incorporated into the OAIA submission to the House of Commons Committee on the Environment and Sustainable Development when it begins its hearings, likely early in 2011.

You can download the conference program and many of the presentations from our website (<http://www.oaia.on.ca/>).

The 2011 conference to be held in October/November in Toronto. Conference planning is underway. Stay tuned to the website for all the details.

First Nations EA Toolkit June, 2010

In June, OAIA organized a forum in Toronto on the recently-developed First Nations EA Toolkit. The forum was attended by 60 EA practitioners. The purpose was to understand better how Ontario First Nations use, and participate in, various EA processes.

What conference attendees said:

"Topical and timely – good variety of speakers."

"Access to senior government staff."

"It was a diverse, dynamic, and interactive conference. A lot of useful information..."
